

As part of the development activities in the real estate projects, architecture, ho.re.ca and industrial construction sectors, we have a Division that deals specifically with the development of customers who produce and / or sell products and services necessary in these sectors.

- External roofing of buildings, industrial warehouses etc.
- Floors
- Movable walls
- Soundproofing
- Technical parts for cleaning skyscrapers
- Every service and product for skyscrapers and similar buildings

If you are a company that produces products or sells useful services in the sectors, we could be the right developer for you.

If you are an investor and would like to analyze a sector property before starting or completing a due diligence, we can do so worldwide.

If you need to choose an architectural firm, or a development company or a supplier for your new real estate project, for the coverage of your old or new hotel or your skyscraper, do not hesitate to present the project to us. Certainly, we could create a suitable, strategic and convincing team. In addition, with our supervision, you can avoid problems, mishaps and delays.

▪

As always, our advice is to write to us, to present your company or to write us what your goals or desires are. The TDHI HUB Division will make a first analysis, and will send it to our General Manager Dr Magri and to you in copy.
